

Safe Step®

PRO SERIES™ 960 CHOICE FORMULA ICE MELTER WITH MG 104®

A premium blend for maximum ice melting results

Hard working, long lasting power and safety

Safe Step® Pro Series™ 960 Choice Formula uses a patent pending blending process to ensure uniform distribution of optimal ingredients, allowing them to work together for maximum ice melting power. Perfectly sized granules formulated with MG 104® provide better melting and complete ice penetration, lasting 2½ times longer than conventional ice melters. Although it's tough on ice, Safe Step® Choice Formula is still safer for people, pets and vegetation.*

Nothing beats premium ingredients

Safe Step® Choice Formula is scientifically formulated with top tier ingredients that outperform simple blends. Simple blends usually contain a high percentage of rock salt simply mixed in the bag with other ingredients, while still charging a premium price. Safe Step® Choice formula contains fewer chlorides, is less corrosive, and more environmentally friendly.

You need it. You got it. Count on it.

In addition to Safe Step® Choice Formula, we have a full line of professional ice melters which are available only in the Jan/San industry. These products are designed to meet your specific needs and price points. With our nationwide availability, we ensure that you get the product you need when you need it. For the best ice melters in the business, look to Safe Step® Pro Series™ your ice melting authority.
