

STOP THE SPREAD OF INFECTION!

According to the CDC, the flu kills between 3,000 and 49,000 Americans every year. It is important to be prepared and take the required steps to clean and disinfect properly with an effective infection control program, including the right products combined with training and management tools. Whether it's a common cold, Norovirus, or SARS-CoV-2, Spartan offers a program to keep building residents safe and healthy.

Today's cleaning professionals are on the front lines of helping prevent the spread of infection. Rely on Spartan Chemical to provide targeted solutions for infection control. Hand washing and sanitizing solutions are your first line of defense against the spread of viruses. Effective cleaners and disinfectants break the cycle of infection on high-touch surfaces. Training and education tools ensure safety, professionalism, and compliance.

Your world is busy enough. Count on Spartan Chemical for products and services that make infection control simple.

WHAT IS A ONE-STEP DISINFECTANT?

A one-step disinfectant has been verified by the EPA to be effective against named organisms in the presence of 5% blood serum solution. These products generally do not require pre-cleaning in order to disinfect a hard surface as long as dwell time is observed. However, related to SARS-CoV-2, the CDC is recommending a multi-step cleaning process including pre-cleaning prior to disinfection.

INFECTION TRANSMISSION

Direct contact with blood and/or bodily fluids

Direct contact with a contaminated surface

Exposure to airborne infectious agents

A FRESH CLEAN DISPENSER EVERY TIME WITH FOAMYIQ™

Germs can build up on hand hygiene dispensers. foamiQ is the first dispensing cartridge. When foamiQ is empty, simply unlock and recycle it, then easily replace it with a fresh, new one.

LITE 'N FOAMY® TOUCH FREE DISPENSER

Convenient for free standing hand sanitizer stations. Help to reduce the spread of germs. Bulk fill system provides economic and sustainability benefits. 977200, 977400

PROPER HAND WASHING TECHNIQUES

1

Wet your hands with warm, running water and apply handwash.

2

Lather well and rub vigorously together for at least 20 seconds.

3

Rinse well.

4

Dry your hands with a clean or disposable towel

5

If necessary, use a towel to turn off the faucet.

*

Remember to scrub all surfaces of your hands.

CLEANING CHECKLIST

- Gather supplies and apply PPE
- Read disinfectant label, noting dwell time
- Pre-clean surfaces using an appropriate cleaner for the soil load
- Apply product and allow surface to remain wet for specified dwell time
- Wipe with clean, damp cloth or sponge
- Repeat on all high touch surfaces
- Return supplies
- Always wash your hands

HIGH TOUCH SURFACES

- cart handles
- bed rails
- bedside tables
- toilets
- sinks
- telephones
- remote controls
- doors
- door handles
- light switches
- cabinets
- buttons
